

## General Manufacturing

### Annealing on metal

For the aerospace industry it is important not to modify the material surface. The annealing process is perfect to satisfy this request and to mark with depth no more than: 0.005–0.008 mm. The UniQ is a good solution to obtain a black marking.

UNIQ 15W

LENS: 254mm

MARKING TIME: 18 s

MATERIAL: Steel
